Home Page

Home page is landing page of the application. It contains login form where the user can login to get access to the website. On the top right corner is the signup button.

Signup page

If the user is new user then
he/she can signup.

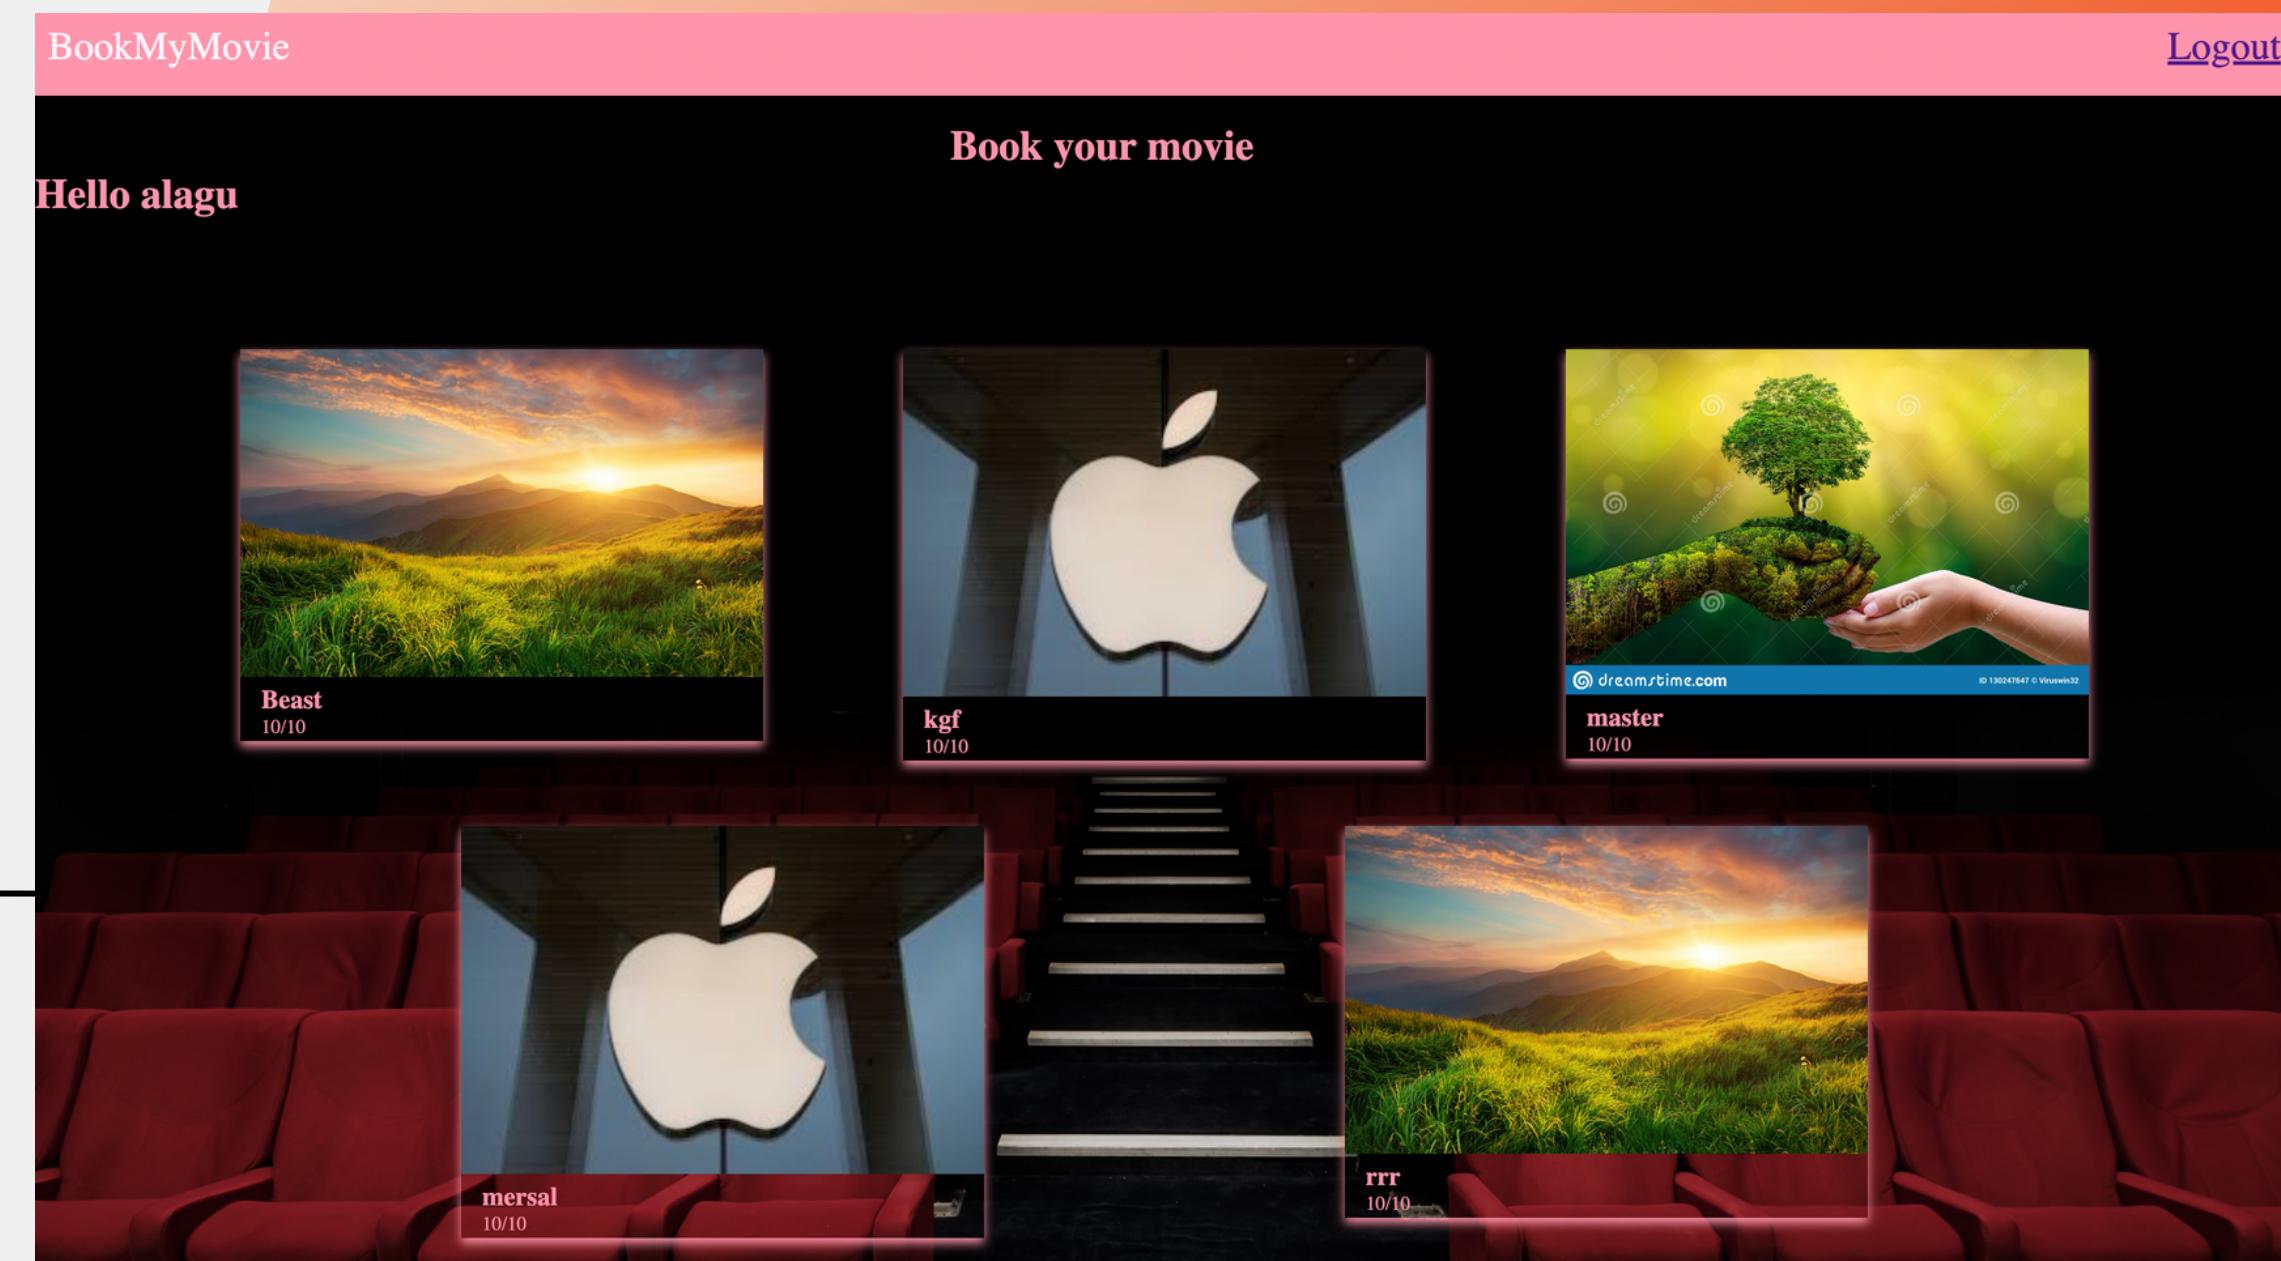

Admin Page

Admin page is accessed by admins. Admins can add movies here.

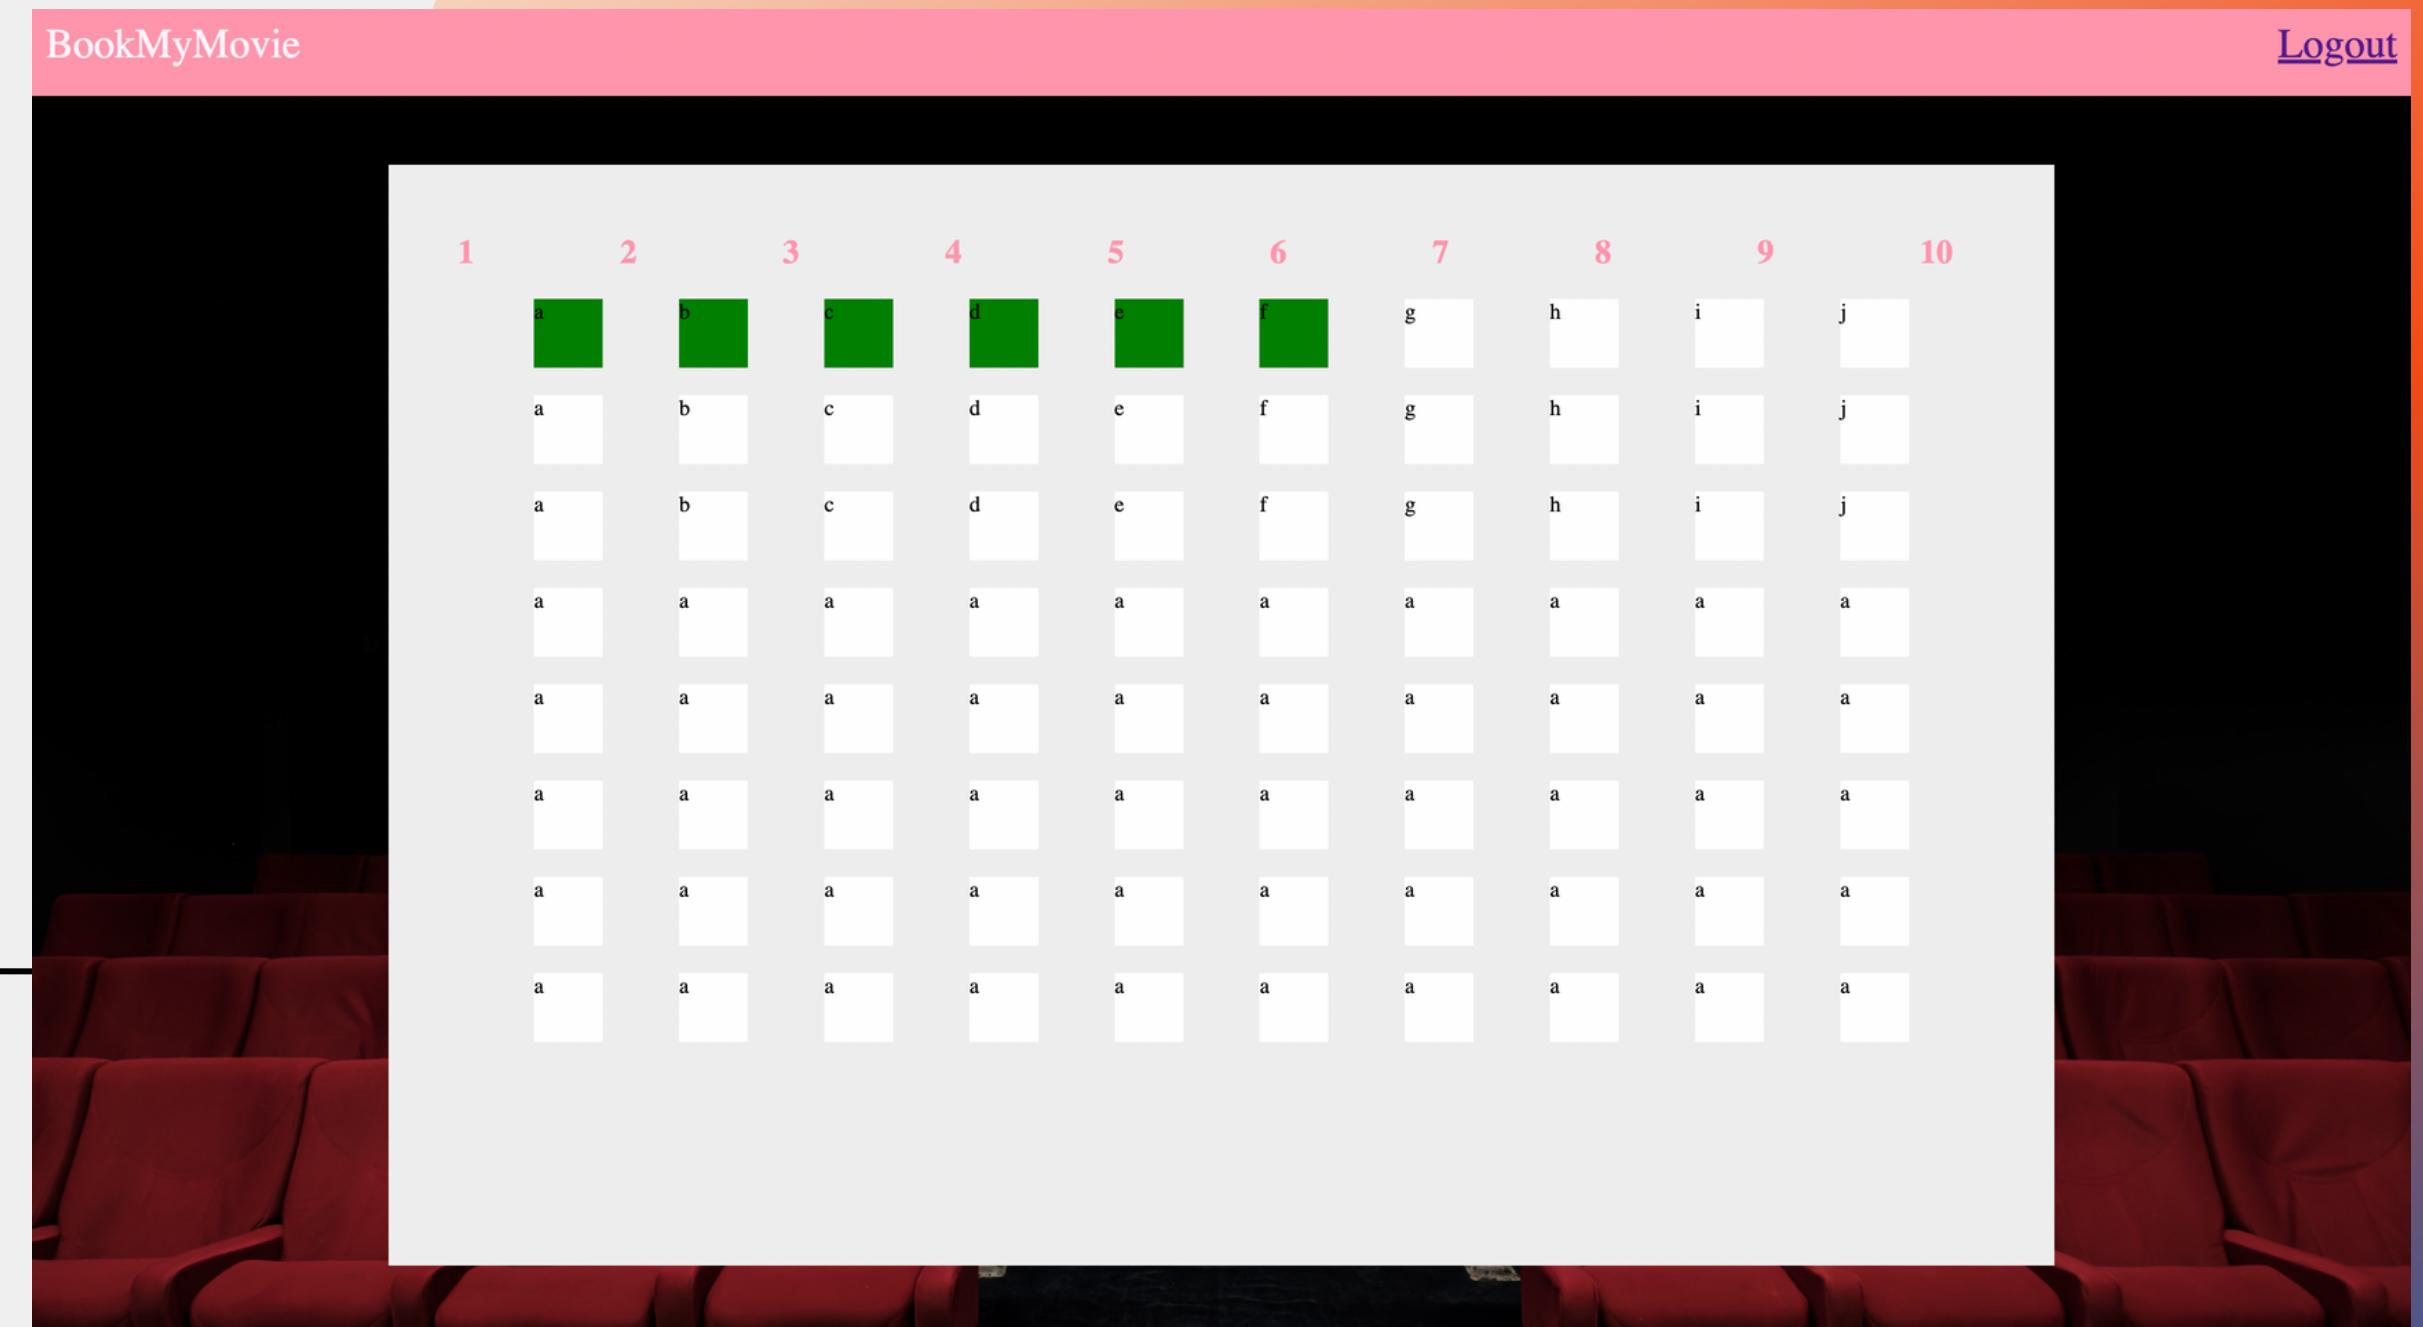

Dashboard

It is the login dashboard of the user where he/she can find the movies currently showing and upcomming movies.

Seats Page

Here one can view the available seats and book the seat.

Invoice page

It displays the invoice for the seats booked.

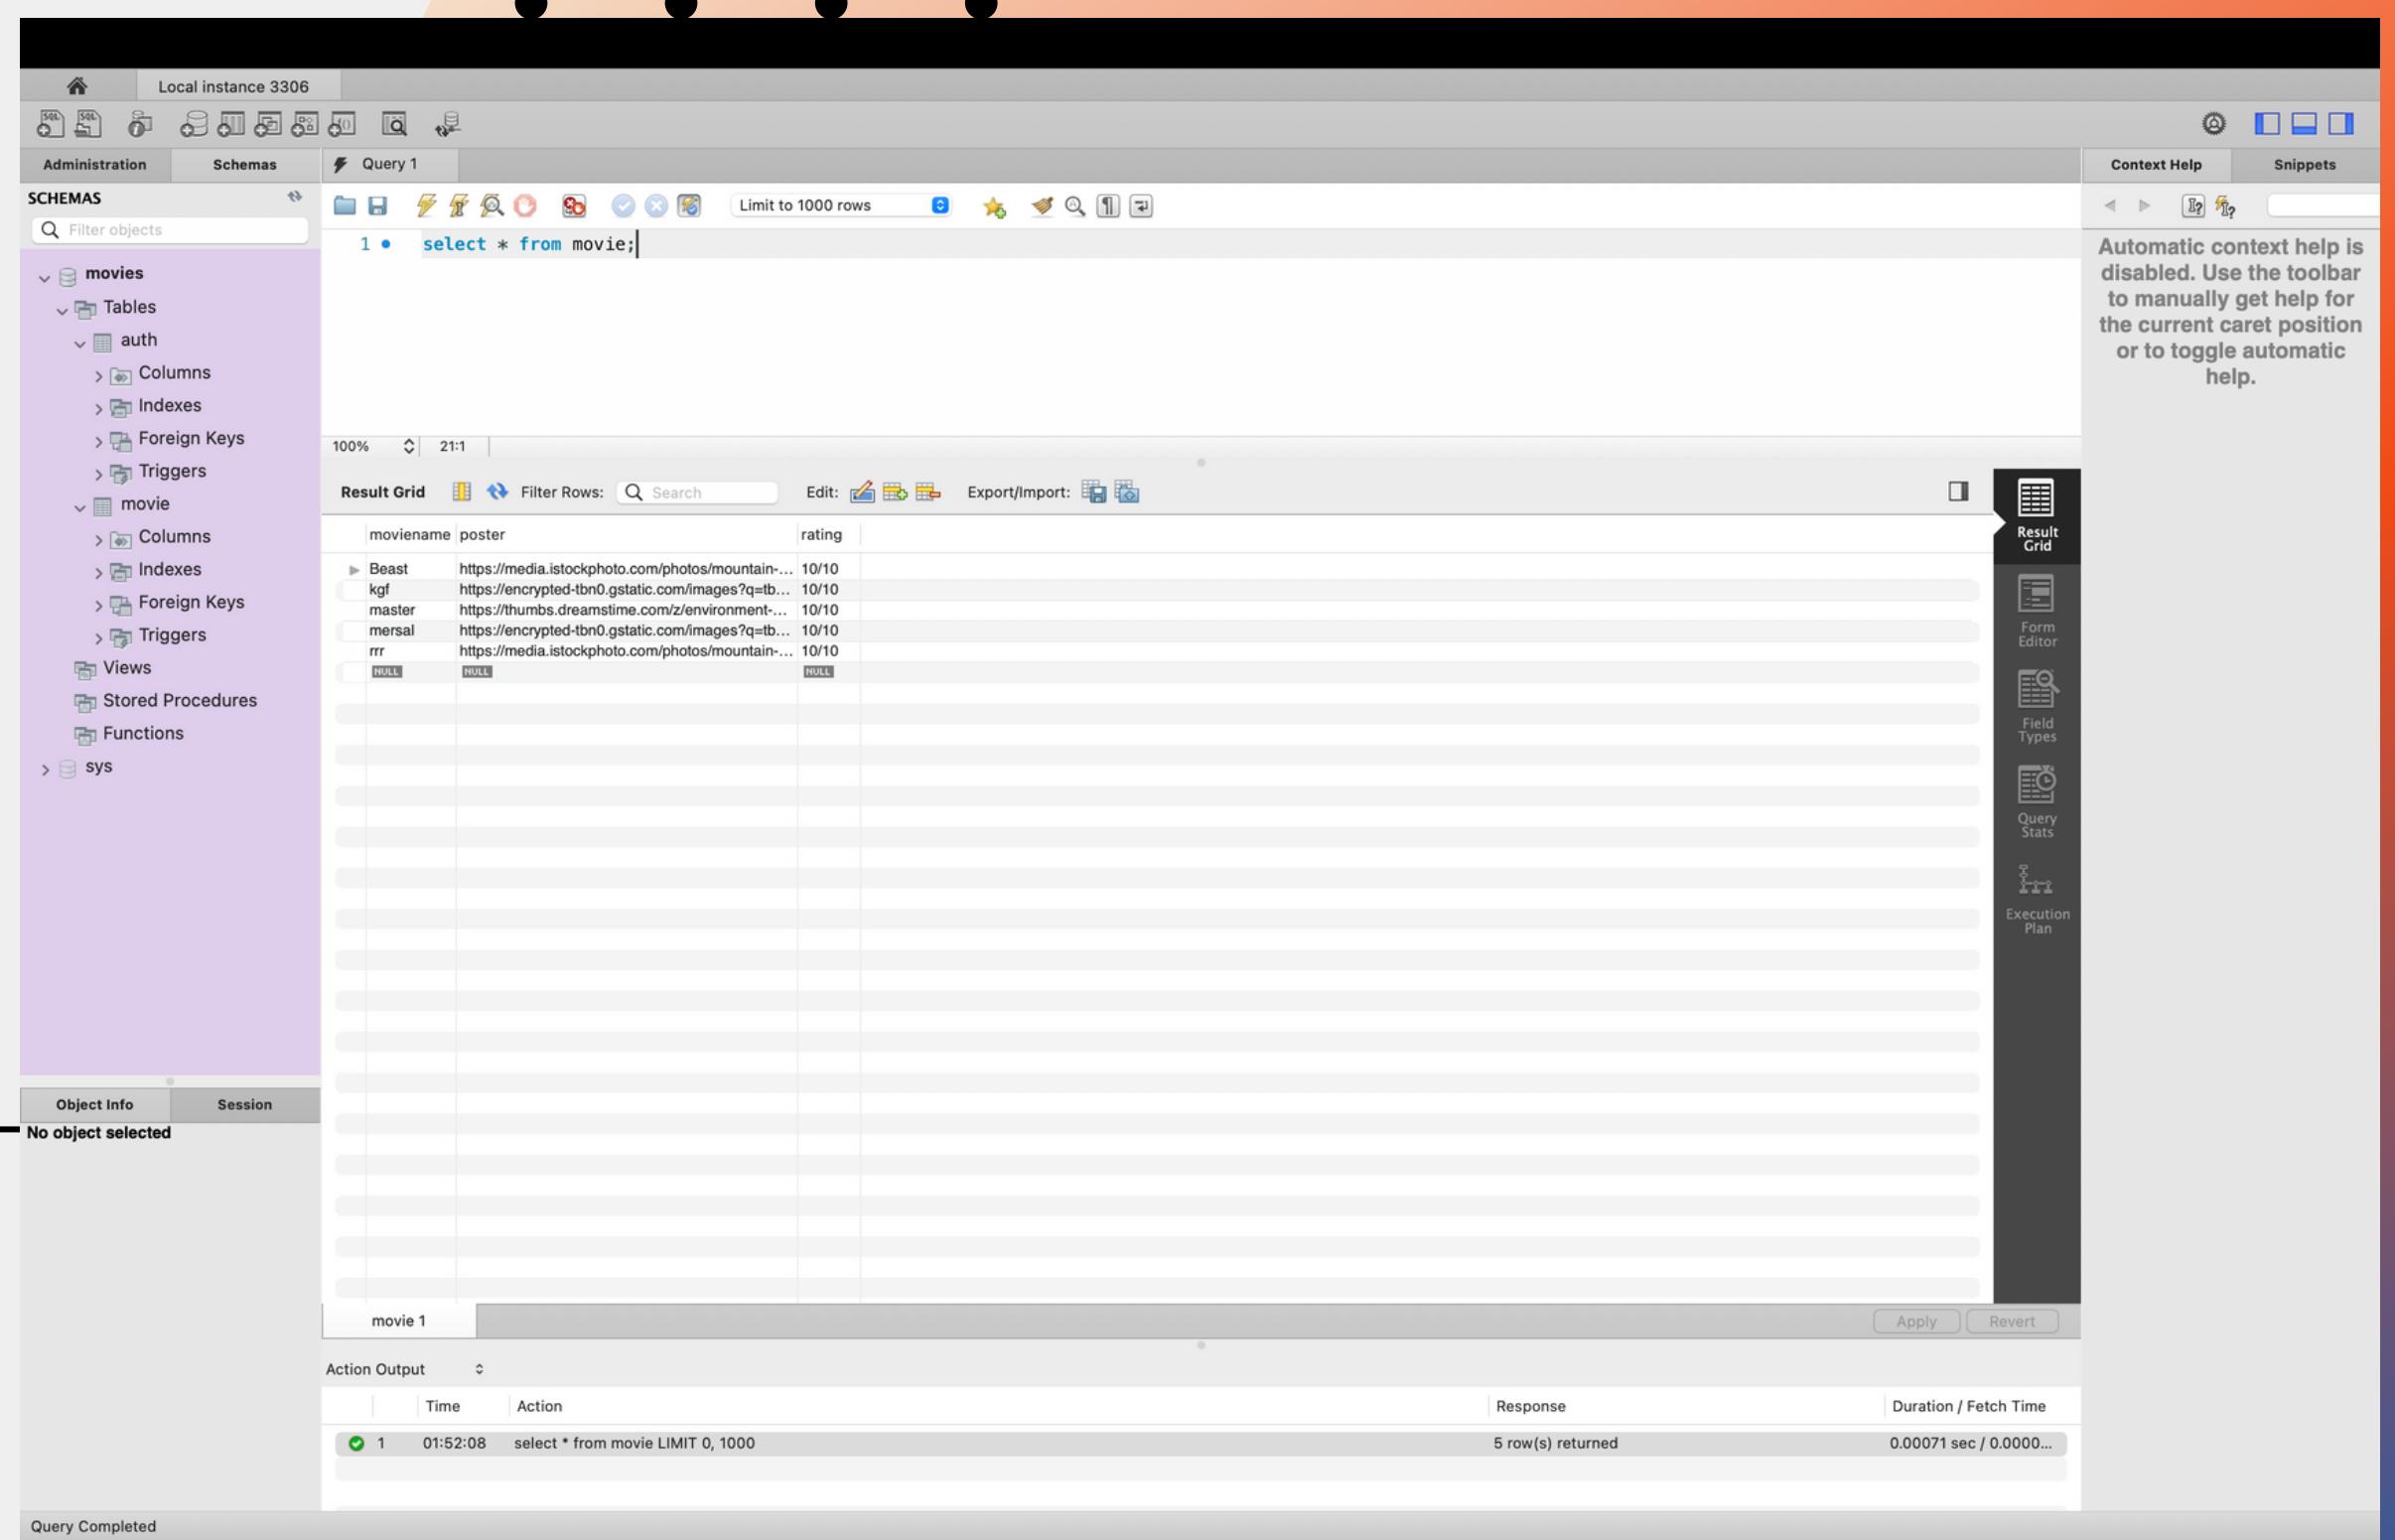

The image shows a screenshot of a movie ticket booking website. At the top, there's a navigation bar with the logo "BookMyMovie" on the left and a "Logout" link on the right. Below the navigation bar, the word "Invoice" is prominently displayed. Underneath "Invoice", there's a section labeled "alagu" followed by "6 seats" and "Rate :1200". In the background, there's a photograph of a movie theater interior with rows of red seats facing a dark screen. The overall design has a modern, clean look with a color palette of red, black, and white.

Database

There are two models

1. Auth

2. Movies

A screenshot of a database management interface, likely MySQL Workbench, showing a query results grid. The interface includes a left sidebar for navigating schemas and objects, a top toolbar with various icons, and a right sidebar with tabs for different tools like Result Grid, Form Editor, and Field Types.

The main area displays the results of the query:

```
1 • select * from movie;
```
